A Note on Michelson

- Michelson was born in Strzelno in 1852 and the family migrated to the USA when he was two years old.
- In 1894 at the dedication of the Ryerson Physical Laboratory, University of Chicago, even he thought the End of Physics was nigh:-
- *" The more important fundamental laws and facts of physical science have all been discovered, and these are so firmly established that the possibility of their ever being supplanted in consequence of new discoveries is exceedingly remote ... Our future discoveries must be looked for in the sixth place of decimals".*
